Three WHGA Engineers Become LEED Certified

Chantilly, VA – December 22, 2006 – Mr. Robert Walker, PE, CLA; Ms. Laura Miller, PE; and Mr. Scott Peterson, PE, all William H. Gordon Associates (WHGA) engineers in the Chantilly, Virginia office, now have the prestigious title of being a Leadership in Engineering and Environmental Design Accredited Professional (LEED AP). To become a LEED AP, each engineer had to pass a rigorous exam that tested their understanding of green building practices and principles, and their familiarity with LEED requirements, resources, and processes. With their certification, WHGA can now further their dedication to creating designs that promote a healthier working environment for building occupants and that conserve natural resources.

WHGA is currently working on multiple LEED certified projects including the U.S. Coast Guard Headquarters, Arlington Trades Center, Westover Library, Shirlington Library, and are awaiting certifications on several other projects that have been registered for LEED certification.

WHGA is a civil engineering, surveying, landscape architecture, land planning, site security consulting, and GIS firm serving both public and private sector clients. Established in 1976, WHGA has executed engineering studies and assessments, master planning, preliminary design, and final design concepts for thousands of construction plans. With regional offices in Chantilly, Virginia and Leesburg, Virginia; WHGA also has branch offices located in Winchester, Virginia; Prince William, Virginia; and Charles Town, West Virginia.
